
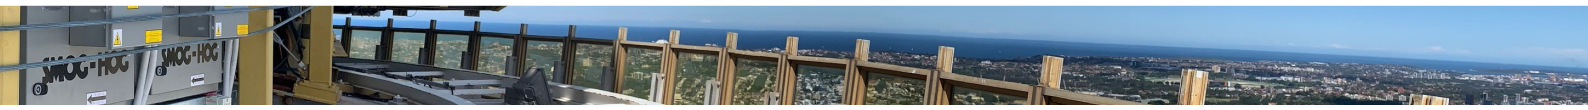
PATRONUSX



IOT SYSTEM PROTECTOR

State of the Art Asset Condition Monitoring System

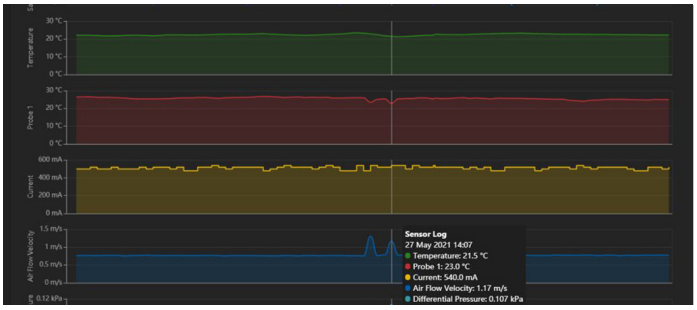
PATRONUSX provides complete protection of assets using on-line web based monitoring of on-site sensors. Extra asset protection is provided by programmable alarm points that provide early warning of potential asset danger or failure by either a text message or email. A simple login to your web portal by PC, Phone or Tablet gives full access to data and settings 24 Hours a day.

PATRONUSX is a true “ONE STOP” asset monitoring solution with complete throughput starting from your on-site hardware to remote web based data collection.

DATA & ANALYTICS

Data from devices is transmitted through the NB-IoT network to our cloud based server, where we employ proprietary algorithms and artificial intelligence to turn data into meaningful information.

Machine learning identifies patterns from your assets to give deeper insights into your operation.



- **IOT Wireless Data Acquisition**
- **Remote Asset Monitoring**
- **Up to 7 Inputs**
- **Suits most Analogue Sensors**
- **Geo-location included**
- **IP65+ Enclosure**
- **Cloud Based Data Storage**
- **Web based access**
- **Custom alerts by SMS or email**
- **QR-Code Identifier**
- **Scheduled or on demand reports**
- **Multiple users via permissions**
- **Retrieve data and analytics from PC or Mobile**
- **Australian designed, manufactured & supported**

Get in touch with one of our team for more information on how PATRONUSX can deliver key performance metrics through easy, seamless monitoring of key assets on demand.
